

Electricity to all Space Business Centres is supplied and managed by E.ON, one of the UK's largest energy suppliers to business. Space Business Centres has negotiated competitive electricity rates for all tenants.

No penalty charges

At Space Business Centres you won't incur penalty charges from early termination of your electricity supply contract should you need to move premises. However, you will be required to remain on the agreed contract whilst you stay in the premises or the contract ends (whichever is sooner).

Smart Metering

Your electricity supply is metered by state-of-the-art 'Smart Metering'. More technologically advanced than traditional meters, the Smart Meter automatically sends your meter reading to E.ON via SMS technology which is then used for billing.

What are the benefits of Smart Metering?

- No more estimated bills - all your electricity bills will be based on your actual consumption
- No need to submit your own meter readings
- Better financial planning & forecasting as you'll have a clearer idea of actual consumption & spend
- No more inconvenient visits from the meter reader

Moving in - how to set up your electricity supply

Setting up the electricity supply to your Space Business Centre unit couldn't be easier, simply call E.ON on **0800 092 3990**, stating that you are a Space Business Centre tenant. Space Business Centres will already have informed E.ON that you are a new tenant so they'll be expecting your call.

E.ON will need to know when you expect to move in, you'll also need to confirm some details (see below) and your new contract will be set up there and then. Shortly afterwards you will receive a welcome pack giving you all the information you will need including confirmation of your electricity rates.

On your first day in your new unit you will need to read the meter to ensure that this corresponds correctly with the reading taken automatically by E.ON on the same day (all meter readings after this will then be automatic).

You should then call E.ON with your meter reading on **0800 092 3990**

When setting up your new contract you will need the following information to hand;

- | | |
|---------------------|---|
| • Company name | • Contact telephone no |
| • Company address | • Contact mobile no |
| • Contact name | • The date you take over the unit |
| • Contact Job title | • The meter reading on the day you take responsibility for the unit |
